

**Description:** Bankirai terrace oil is a maintenance product based on natural oils which feed the wood and restore its natural colour. Suitable for terraces, fences, garden furniture, etc. made of (hard) wood, teak, rattan, reed and bamboo which have aged due to the weather. Bankirai terrace oil penetrates deep into the pores of the wood and prevents ageing. For exterior use.

**Use:** Wooden objects which have aged due to the weather such as hardwood garden furniture, teak, rattan, reed and bamboo.

#### Application

Stir thoroughly prior to use. Apply a thin uniform coat every 3 to 4 months along the length of the wood using a long-haired brush or cloth. Let the oil soak in for approximately 10 to 20 minutes depending on the uptake in the wood. Remove surplus oil with a lint-free cloth in order to achieve the best possible results. Oil is not a varnish and does not have to form a coating.

**Dilute with:** Ready to use.

**Covers:** Heavily dependent on the coating thickness and the structure of the surface to be treated.

#### SYSTEM CONSTRUCTION

##### Preparation

The substrate must be dry, clean and free from grease. If heavily aged, clean with a suitable 'hardwood degreaser', rinse thoroughly with clean water, leave to dry, sand lightly and remove dust.

#### TECHNICAL DATA

**Dilute with:** Ready to use

**Hazard classification:** See safety information sheet (MSDS)

**Tool cleaning instructions:** White spirit or brush cleaner. It is recommended to use disposable brushes.

**Storage:** Minimum of 12 months in the tightly sealed original packaging in a dry, cool and frost-free place.

##### General information

Do not use at temperatures below 10°C, in direct sunlight or when rain or fog is expected. Replace lid firmly after use and store in a cool and frost-free place.

Harmful particles may be released when sanding or scraping off coats of paint, etc. Work in a well-ventilated area and use the correct protective equipment if necessary.

**Warning:** Used rags and cloths can ignite if they become overheated. Always spread them out and leave outside to dry or pour water over them.

**Surplus product:** This product and the packaging should be disposed of at a collection point for hazardous or special waste.
