

Description: Extra matt wall paint with excellent hiding power and a very long open time, based on a synthetic resin dispersion. Prevents colour variations between strokes, good flow. Solvent-free and preserves the texture of the substrate. Designed specifically to provide a smooth finish on highly absorbent surfaces such as plasterwork and spray plaster (spackling). For interior use.

Use: Meant, in particular, for surfaces that have very strong suction properties such as spray plaster (spackling) and gypsum plaster. Suitable substrates are untreated absorbent cement plaster and gypsum plaster, brickwork.

Properties:

- Long open time
- Avoids significant colour differences between strokes
- Extra matt
- Excellent hiding capacity
- Hides small irregularities in the substrate
- Solvent-free

Colour: White and in light colours in the SPC Color Service colour mixing system.

Application: Stir thoroughly prior to use. The first coat can be diluted with a maximum of 10% water. Apply in 1 or 2 coats using a suitable brush or paint roller. Always work wet-on-wet to prevent visible marks in the paint. Back-roll all overlaps in the same direction. Do not touch up when drying.

Covers: approx. 7 m²/litre per coat. The stated coverage is theoretical. The actual coverage depends on the nature and the structure of the surface and the application method.

Drying time at 23°C and relative humidity of 65%:

Dry after approximately 2 hours.

Can be painted over after approximately 6 hours.

Variations in coating thickness, temperature, humidity etc. affect the drying time.

SYSTEM CONSTRUCTION

General:

The surface must be capable of supporting the paint, completely set, clean, dry, and free from dust or grease. Sand and repair surface irregularities. Remove and/or repair all loose and unstable coats.

New, untreated substrates

- Completely paint absorbent substrates with SPS Plafond Mat.
- Thoroughly clean powdery surfaces. Prime using Stabilising primer after allowing to dry.
- Apply the top coat after allowing to dry.

Stains caused by nicotine, damp, rust or soot

- Clean thoroughly using SPS Paint cleaner.
- Treat surface/stain with SPS Sealing primer.
- Apply the top coat after allowing to dry.

The systems described above apply for the most common types of surface. For specific applications and/or detailed advice, please contact SPS bv.

TECHNICAL DATA (apply to the colour white)

Binding agent:	Synthetic resin dispersion
Pigments:	Rutile titanium dioxide and fine fillers
Solvent:	Water
Solid components:	40 % v/v
Specific mass:	approx. 1.43 g/ml
Recommended coat thickness:	Dry coating thickness/coat: approx. 55 micrometres Dry coating thickness/coat: approx. 100 micrometres
Degree of gloss:	Extra matt: 1% @ 85°
Dilute with:	Water
Hazard classification:	See MSDS
Tool cleaning instructions:	Use water and soap.

Shelf life: Minimum of 12 months in the tightly sealed original packaging in a dry, cool and frost-free place.

General: The values stated in this technical data sheet have been determined based on DIN EN 13300. Do not apply at temperatures below +8°C. Only apply if the surface temperature is at least 3°C above the dew point temperature. Always use the required personal protective equipment when applying this product. Always ventilate appropriately when applying.

Surplus product: This paint and the packaging should be disposed of at a collection point for hazardous or special waste.
